## To whom it might concern

### Statement considering parasites in Salmon

We hereby confirm that:

- All raw material used by Hofseth undergoes strict control. First control step is reception of the raw material second is when the raw material is fed into production. Entry to production is denied for products not following standards.
- For frozen products our process is in compliance with the FDA freezing requirements for parasite destruction. Products are frozen and stored at -4° F (-20°C) or below for minimum 7 days.
- All our raw material Salmon is raised in open net based operation and exclusively fed parasite free food.
- EU risk assessment state that there is no risk of parasites in Norwegian net based pellets fed Salmon.
